

Can Students Find Course Information with XIPU AI Agent?

A simple task-based usability evaluation with XJTU students.

SYSTEM

XIPU AI Agent

Low-code educational agents with knowledge bases, plugins, and workflow support.

CONTEXT

Course information help

Finding deadlines, assessment details, and learning resources.

PARTICIPANTS

XJTU students

12 to 15 students, three short tasks.

METHOD

Task-based usability

Observed performance, SUS, short questions, and a brief interview.

01 PROBLEM & MOTIVATION

Students may not know whether XIPU AI Agent can help them find reliable course information.

Gap: little evidence shows whether this task is easy, efficient, and trustworthy.

02 RESEARCH QUESTIONS

- RQ1: Can students complete course-information tasks?
- RQ2: How usable and efficient is the experience?
- RQ3: What barriers and improvements do students report?

03 EVALUATION DESIGN

One task-based session per participant, followed by a short questionnaire and interview.

1

Consent

Purpose + rights

2

Tasks

Three scenarios

3

Measures

Success + SUS

4

Interview

Barriers + ideas

04 MEASURES & SAMPLE

Task success

Completion and assistance required

Usability

10-item SUS

Efficiency

Time, prompt count, observed errors

Perceptions

Usefulness, trust, intention

Sample: 12-15 students, following the module usability guidance.

05 PRINCIPAL FINDINGS

Task success

Success rate and assistance

Experience

SUS, trust, and intention

Pending data: insert real figures and anonymised evidence after data collection.

Efficiency

Time and errors

Barriers

Interview themes

06 LIMITS

Small convenience sample, controlled setting, and no system-log access.

07 RECOMMENDATIONS

Discovery

Explain supported tasks.

Recovery

Offer correction examples.

Trust

Show answer boundaries.
